Title:

CLASSIFICATION OF REACTION TO FIRE **PERFORMANCE** USING THE PRINCIPLES OF EN 13501-1:2007 +A1:2009

Notified Body No:

0833

Product Name:

"Mechslip"

Report No:

WF 410145

Issue No:

2

Prepared for:

Ash & Lacy Solutions Ltd **Bromford Lane** West Bromwich West Midlands B70 7JJ

Date:

20th February 2019

Company Registration No: 11371436

1. Introduction

This classification report defines the indicated classification assigned to Mechslip, a brick faced rainscreen façade system, using the principles of EN 13501-1:2007+A1: 2009.

2. **Details of classified product**

2.1 General

The product, Mechslip, a brick faced rainscreen façade system, is defined as being suitable for construction applications.

2.2 **Product description**

The product, Mechslip, a brick faced rainscreen façade system, is described below.

- 50 mm Insulation (Fire Reaction A1) Brick rail (6063T6 with Anodised Finish referred to Drawing No A42)
- Brick Spacer (0.7 mm colorcoat LG referred to Drawing No A45)
- Substrate (Fire Reaction A1)

Generic type		Brick faced rainscreen façade system,			
Product reference		Mechslip			
Name of manufacturer		Ash & Lacy Solutions Ltd			
Thickness		Up to 400mm			
Brick Slip	Generic Type	Brick			
Facing	Reference	Mechslip Brick Slip			
	Thickness	28 mm			
Mounting system	System Ref	AX1/2, or AXR1/2			
	Material	6063T6 alum racket and rail for AX1/2, and 316 stainless steel for AXR1/2			
	Max cladding zone*	365 mm			
Mortar between Bricks		Parex Historic Mortar (sand and cement mix)			
Cavity	Depth	25 - 100mm			
Insulation	Generic Type	Stone wool Mineral Wool			
	Reference	Mineral wool of class A1			
	Facing	With or without glass tissue or foil facing			
	Thickness	≤ 340mm			
	Binder	< 5%			
	Content				
	Density	19-220 kg/m ³			
Brick rail	Generic	Steel or Aluminium with anodised finish			
Substrate	Not included in report – should be A1				

- **Note 1:** The sponsor has confirmed that no flame retardant additives were utilised in the Various elements of the system.
- **Note 2:** This system does not include a vapour barrier or a breather membrane, since these components are not Class A1. If a vapour barrier is required guidance as to the required fire classification is given in Approved Document B
- **Note 3:** The cavity should be closed at each floor slab using a cavity barrier in accordance with B3 of Approved Document B

3. Documentation in support of classification

Product (Component Part of External Wall System)	Reports and other Information		
Brick Slip	Classified without further testing as A1 Commission Decision 96/603/EC, as amended 2000/605/EC		
Mounting system	Stainless Steel or Aluminium- Classified without further testing as A1 Commission Decision 96/603/EC, as amended 2000/605/EC		
Mortar between Bricks	Parex Declaration of Performance No. EA 002##v1 Against EN 998-2 Class A1		
Cavity	Air only		
Insulation	Class A1 LPCB certificate 022e and BSI certificate 0086-CPD-461281. Insulation should have a binder content of <5% and a density 19 to 220 kg/m ² .		

3.2 Test results

Test method &		No. tests	Results	
test number	Parameter		Continuous parameter - mean (m)	Compliance parameters
	ΔΤ	ΔΤ		
EN ISO 1182	Δm	5	<50%	Compliant
	tr		No flaming	
EN ISO 1716	PCS (a), (e)	3	<2.0 MJ/kg	Compliant

4. Classification and field of application

4.1 Reference of classification

This classification has been carried out following the principles of EN 13501-1:2007+A1: 2009 based on products which form a façade system which individually are deemed to be Class A1 in accordance with Commission Decision 96/603/EC, as amended 2000/605/EC or that have been tested and certificated as having an A1 performance.

4.2 Classification

The product, "Mechslip", a brick faced rainscreen façade system, in relation to its reaction to fire behaviour is classified:

Reaction to fire classification: A1

4.3 Field of application

This classification is valid for the following end use applications:

i) Construction applications

This classification is also valid for the following product parameters:

System thickness or depth

Insulation thickness

Insulation Density
Insulation Binder Content

Cavity Depth

System Composition

Substrate

No variation from the described system allowed

≤ 340mm

19 to 220 kg/m³

<5%

≤ 100mm

No variation allowed

Class A1 only

SIGNED APPROVED

Katherine Williams
